**Stories that
matter.**

DMASS Business is the leading company in production and commercialization of completely organic farm produce. A 100% Mexican enterprise that has become one of the most important benchmarks of garden produce both in the Mexican and international markets.

We have more than 17 years of experience backing us up, but our clients, from North America and Europe to Middle East, are our biggest strength and guarantee our professionalism.

In addition of having more than 200 acres of top quality crops, we also have more than 24 certifications as important as SAGARPA's organic product seal, and others like SENASICA, Bioagricert, Global GAP, amongst others.

We grow the best varieties of avocado, mango, banana, watermelon, papaya, pineapple, melon, lychee, lemon, jackfruit, coffee and sugar, all seasonal farm produce that are always delivered guaranteeing their freshness and top quality.

OUR MISSION

Being a leader company in the production and commercialization of organic farm produce in national and international markets.

We aim to distinguish ourselves for the superior quality of our products and the satisfaction of our clients, building a strong long term relationship with them.

OUR VISION

Increase our leadership in the commercialization of our farm produce, providing a quality service with continuous improvement, expanding our commercial relationships and guaranteeing the satisfaction of your clients.

OUR **PRINCIPLES**

1 TRUST

We recognize and believe our clients and work team act in good faith.

2 LOYALTY

Committed to serving our clients at all times.

3 PROFESSIONALISM

Achieving it through discipline, trust, and the desire to learn and progress.

4 INNOVATION

Using technological tools that allow us to fully develop our company.

5 TRANSPARENCY

Always acting consistently providing clear and timely information.

AVOCADO CHARACTERISTICS

The fruit is an oval berry with seed that can present a smooth or rough surface, its weight range is wide (between 4 and 5.5 oz), and its color is greenish with thin or thick skin. When ripe, the pulp has the consistency of hard butter and its flavor reminds mildly of that of the walnut. It is very rich in protein and fats with an oil content of 10 to 20 percent.

This fruit provides energy, reduces cholesterol, is an antioxidant, contains folic acid and is richer in potassium than bananas.

Avocado is very rich in good fats, most of them are monounsaturated. It is full of vegetable oils such as oleic acid and a good amount of Omega-3. This set of fats is what gives avocado its great caloric intake.

AHUACATL

A NAME OF NAHUATL ORIGIN

Avocado is “**ahuacatl**” in Nahuatl. The word “ahuacatl” also means testicle, in reference to the way in which said fruit hangs from the tree.

SURFACE
Smooth or rough surface.

COLOR
Greenish with thin or thick skin.

PULP
Has the consistency of hard butter and its flavor reminds mildly of that of the walnut.

OIL
5 grams of monounsaturated fat and 1 gram of polyunsaturated fat per serving.

WEIGHT
Between 4 and 5.5 oz

MEXICAN AVOCADOS

AVOCADO EDAPHIC CONDITIONS AND CLIMATE

The avocado tree is a tall tree that can grow from medium to large; it has a very generous flowering that sets fruit in a very high percentage. It is sensitive to cold and humidity, so it is advisable to establish the plantation in regions free of frost and hot and dry winds. The temperature and the precipitation are the two factors with highest incidence in the development of the crop; it is considered that 1,200 mm yearly of well distributed precipitation are sufficient. It is recommended to grow at altitudes between 800 and 2,500 m.

GROWS AT ALTITUDES

800 and 2,500 m.

MEXICAN AVOCADOS

AVOCADO USES

Avocado is used as raw food; combined with other vegetables as a salad; as a complement to all kinds of food due to its high content of proteins, vitamins, minerals and oils.

It's also used in creams and soups, due to its low sugar content. The famous guacamole - avocado sauce-, ahhuacamolli in Nahuatl, exists thanks to avocados.

The oils can be extracted from its rich fat that, once processed, are used in the cosmetic and pharmaceutical industries.

AVOCADO **PACKING**

PACKING FACILITY URUAPAN, MICHOACÁN

In our packing plant located in the state Michoacan we have trained and certified personnel which is responsible for selecting each avocado with the help of a packing machine. After being selected, each fruit is washed and packed in cardboard boxes with presentations of 4 and 6 Kg. After this process, pallets are made and placed in refrigeration chambers where the product will be maintained in optimal conditions for targeted output.

MEXICAN AVOCADOS

AVOCADO **PACKING**

PACKING FACILITY **NAYARIT**

One of our main packing plants is located in the state of Nayarit. In this location, we process Hass avocado with the same quality standards as that of Michoacan.

Here we work with more than 270 producer associates and 3706.581 acres of their own, producing 100% organic fruits.

MEXICAN AVOCADOS

AGRICULTURAL CERTIFICATIONS

U.S. FOOD & DRUG
ADMINISTRATION

MEXICAN AVOCADOS

AGRICULTURAL CERTIFICATIONS

As the Work Plan for the Export of Avocado to the United States of North America establishes, any Packing-Exporter company must register as a packer and have the according certification. For such effect a Verification Unit authorized by SAGARPA verifies every year our installations and the controls for carrying out the packing tasks according to the specifications that the Work Plan itself establishes.

POLLUTION RISK REDUCTION SYSTEMS

DMASS BUSINESS S.A. de C.V., with the interest of sending harmless products to the final consumer, has implemented this system to reduce the possibility of contamination.

What is the Pollution Risk Reduction System (SRRC)?

It is the group of measures and procedures established voluntarily by SAGARPA to ensure that goods of agricultural, livestock, aquaculture, and fishing origin are produced and processed under hygienic conditions, and that the dangers of physical, chemical, and microbiological contamination are reduced through the application of good management practices.

Food and Drug Administration

DMASS BUSINESS S.A. de C.V., is registered with the U.S. Food and Drug Administration pursuant to the Federal Food Drug and Cosmetic Act, as amended by the Bioterrorism Act of 2002 and the FDA Food Safety Modernization Act, such registration having been verified as currently effective on the date hereof by Registrar Corp:

INTERNATIONAL QUALITY STANDARDS

IN HANDLING PERISHABLE PRODUCTS

In DMASS Business we follow the highest international quality regulations to handle perishable products.

More than looking for clients, we aim to build partnerships, that's why our main goal is to create long term alliances delivering quality products.

The perishable produce requires an adequate refrigeration, freezing or deep-freezing process, to avoid the growth of microorganism.

This process, best known as 'cold chain', is a series of tasks and processes (storage, distribution, packaging, transport, loading and a loading) with controlled humidity and temperature.

We have partnered with experts like DICEX Integral Trade and AMS Logistics Movers to ensure the products arrive to their destinations in perfect state.
