Stories that matter.

DMASS Business is the leading company in production and commercialization of completely organic farm produce. A 100% Mexican enterprise that has become one of the most important benchmarks of garden produce both in the Mexican and international markets.

We have more than 17 years of experience backing us up, but our clients, from North America and Europe to Middle East, are our biggest strength and guarantee our professionalism.

In besides of having more than 200 acres of top quality crops, we also have more than 24 certifications as important as SAGARPA's organic product seal, and others like SENASICA, Bioagricert, Global GAP, amongst others.

We grow the best varieties of avocado, mango, banana, watermelon, papaya, pineapple, melon, lychee, lemon, jackfruit, coffee and sugar, all seasonal farm produce that are always delivered guaranteeing

OUR MISSION

Being a leader company in the production and commercialization of organic farm produce in national and international markets.

We aim to distinguish ourselves for the superior quality of our products and the satisfaction of our clients, building a strong long term relationship with them.

OUR VISION

Increase our leadership in the commercialization of our farm produce, providing a quality service with continuous improvement, expanding our commercial relationships and guaranteeing the satisfaction of your clients.

OUR PRINCIPLES

1 TRUST

We recognize and believe our clients and work team act in good faith.

2 LOYALTY

Committed to serving our clients at all times.

3 PROFESSIONALISM

Achieving it through discipline, trust, and the desire to learn and progress.

4 INNOVATION

Using technological tools that allow us to fully develop our company.

5 TRANSPARENCY

Always acting consistently providing clear and timely information.

JACKFRUIT CHARACTERISTICS

It is known as Jack Fruit, although there are also those who call it saca, jackfruit, panapén and even jack. But what really stands out about this fruit is its size. Much larger than an ostrich egg. It can weigh up to 35 kilos and measure almost 90 centimeters long by 40 wide.

Thorny tropical fruit with a fibrous texture, with a pleasant sweet and sour flavor, covered by small cones.

Within the fruit we can find up to 500 seeds. The seeds reach 4 to 5 cm. It is usually the largest fruit in the world since it can weight up to 40 kilos.

The fruit is also known as jackfruit. Jackfruit fruits are huge, up to 90cm long, hanging from the branches and the trunk. (It is one of the world 's largest fruit).

The skin of this fruit is rough, green- yellow and presents sharp protrusions.

The flesh is yellow or orange.

When ripe, it provides an unpleasant smell. The fruit has an open odor between a banana and a pineapple.

from pink to
red.

MEXICAN JACKFRUIT

JACKFRUIT EDAPHIC CONDITIONS AND CLIMATE

Evergreen tree related with breadfruit and fig. Jackfruit tree usually measures over 20 m. in tropical places. Noted for its dense and broad crown, with large leaves of 20 or more cm. long. These leaves are dark green, glabrous, glossy, oblong, deeply lobed or leathery.

Monoecious plant with male and female flowers in groups, growing from the same trunk or branches.

The Jackfruit grows on a tree called evergreen as it is available year-round. It can reach a height of up to 37 meters and has a smooth, red bark.

Jackfruit is the largest tree-borne fruit in the world, reaching up to 60 cm (about 2 feet) long and weighing up to 18 kg (about 40 pounds). It is ellipsoidal and aggregate, composed of multiple “bulbs” of seed-containing flesh around a stringy core, all of which is enclosed by a bumpy rind.

JACKFRUIT USES

There is an optimal harvest, its transport is carried out when it changes from green to yellow, it usually takes 20 weeks to reach its optimal state, and must be watered every week during the summer

It produces a seed that can be planted in a very easy way in fixed land, leaving a space between 9 to 12 meters between one seed and another.

It begins to bear fruit at 7 years. The production lasts about 8 months and begins when flowering ends.

The jackfruit is adapted only to humid tropical and near-tropical climates. It is sensitive to frost in its early life and cannot tolerate drought. If rainfall is deficient, the tree must be irrigated.

It works as an antidiarrheal, anti-asthmatic, conjunctivitis treatment and arterial hypertension treatment.

4

The ground seeds are used to make a flour that, mixed with wheat flour, is used to make desserts.

5

JACKFRUIT MARKETING AND EXPORT

The Mexican JACKFRUIT

The jackfruit, with the largest fruit among the fruit species, is an exotic crop that is produced in Nayarit. Some enterprising growers on the Pacific coast of the Republic have taken advantage of the growing demand for an exotic fruit from Southeast Asia and the Pacific Islands.

18,611 TONS
In 2016 produced

According to the Agrifood and Fisheries Information Service (SIAP), in 2016 18,611 tons were produced. Of the 21 municipalities that report jackfruit, San Blas and Compostela, in Nayarit, are the main producers nationwide, followed by Martínez de la Torre, Veracruz, obtaining an average between these three municipalities of 15.41 tons per hectare.

AGRICULTURAL CERTIFICATIONS

U.S. FOOD & DRUG
ADMINISTRATION

MEXICAN JACKFRUIT

AGRICULTURAL CERTIFICATIONS

As the Work Plan for the Export of Avocado to the United States of North America establishes, any Packing-Exporter company must register as a packer and have the according certification. For such effect a Verification Unit authorized by SAGARPA verifies every year our installations and the controls for carrying out the packing tasks according to the specifications that the Work Plan itself establishes.

POLLUTION RISK REDUCTION SYSTEMS

DMASS BUSINESS S.A. de C.V., with the interest of sending harmless products to the final consumer, has implemented this system to reduce the possibility of contamination.

What is the Pollution Risk Reduction System (SRRC)?

It is the group of measures and procedures established voluntarily by SAGARPA to ensure that goods of agricultural, livestock, aquaculture, and fishing origin are produced and processed under hygienic conditions, and that the dangers of physical, chemical, and microbiological contamination are reduced through the application of good management practices.

Food and Drug Administration

DMASS BUSINESS S.A. de C.V., is registered with the U.S. Food and Drug Administration pursuant to the Federal Food Drug and Cosmetic Act, as amended by the Bioterrorism Act of 2002 and the FDA Food Safety Modernization Act, such registration having been verified as currently effective on the date hereof by Registrar Corp:

INTERNATIONAL QUALITY STANDARDS

IN HANDLING PERISHABLE PRODUCTS

In DMASS Business we follow the highest international quality regulations to handle perishable products.

More than looking for clients, we aim to build partnerships, that's why our main goal is to create long term alliances delivering quality products.

The perishable produce requires an adequate refrigeration, freezing or deep-freezing process, to avoid the growth of microorganism.

This process, best known as 'cold chain', is a series of tasks and processes (storage, distribution, packaging, transport, loading and a loading) with controlled humidity and temperature.

We have partnered with experts like DICEX Integral Trade and AMS Logistics Movers to ensure the products arrive to their destinations in perfect state.
